

To whom it may concern,

Thank you for your interest in the Utah C-PACE program.

As the C-PACE District administrator, the Governor's Office of Energy Development (OED) is required by Section 11-42a-106 of the Utah State Code to enter into an agreement with Rocky Mountain Power on the scope of the proposed project. Within this agreement, OED has agreed to notify property owners of the availability of utility incentive(s) for proposed projects. This letter serves as that notice.

Through Rocky Mountain Power's wattsmart program, they offer technical expertise and cash incentives for energy efficiency improvements. This notice does not guarantee that utility incentive(s) for your proposed project exist; nor does this notice suggest that work completed by your respective contractor or developer has not exhausted available utility incentives for your project. If you have not done so already, you are encouraged you to work with the utility and your contractor or developer, to ensure all available incentives are applied to your project.

To learn more, please contact Rocky Mountain Power directly. For projects involving renewable energy systems and interconnection agreement, please contact Douglas Marc at douglas.marx@pacificorp.com or 801-220-4310. For energy efficiency projects, please contact Mark Tourangeau at mark.tourangeau@pacificorp.com or 801-220-4141. OED does not manage or implement any utility incentives in Utah.

Sincerely,

The C-PACE District
